Index to 1942 and 1943 Issues of Electronic Industries

MONTHLY CONTENTS

'42-11

November, 1942
VOL. 1, NO. 1

With Chart — Frequency Spectrum

Page

Electronic Devices Speed America's War Effort 36
The Signal Corps, the Navy, and Radio Engineers—A Message to Radio Men; Major General Dawson Olmstead 38
Electronics in Naval Operations, Captain J. B. Dow..... 39
U. S. Multiplies Radio Output, Ray C. Ellis 48
Study Power Cuts—To Keep BC Stations on Air, E. K. Jett..... 50
Ways to Save Tubes..... 51
Radio Production Short Cuts..... 52
Radio Engineers Must Come Out of Their Shells, Arthur Van Dyck... 54
Electronic Power Sources for Industrial Heating 56
Mobile FM Guides St. Louis Lines (KEHG) 59
Determining Gain in RC Circuits, William Moulic 62
Power Transformers for Aircraft Use, Harry Holubow 69
Electronic Control in Steel-Making.. 73
German Luftwaffe Radio..... 74
Station Operating Short Cuts..... 76
Latest in Electronic Labs, RCA, Princeton 78
Electronic Tubes on the Job..... 80
Electronic Circus on Fifth Avenue.. 82
A One-Pound Transceiver, B. F. Miessner 84
Electron Tube Relationships and Definitions 85
Survey of Wide Reading..... 86
New Patents Issued.....108
Where to Sell to Uncle Sam.....112

'42-12

December, 1942
VOL. 1, NO. 2

With Chart—Radio-Wave Propagation

Page

Electron Speed-Up of Aircraft Output, Gilbert Sonbergh 28
War Standards for Military Radio.. 33
High-Altitude Test for Aircraft Radio Equipment 36
Substitutes for War Radio 38
Aircraft-Engine Power Recovery.... 40
Manufacturing Tests 42
Factory Short Cuts 44
Induction Heating Speeds Tin-Plate Output 46
Phase Inverter Analysis and Design, H. Jacobowitz 47
Newest in 50 KW Transmitters—WLAC, Nashville, Tenn. 56
Calculating Charging Time in RC Circuits, Edison Williams 58
WSPD's New Studios at Toledo 60
When Engineer is Manager, J. Albert Stobbe 63
Station Operating Methods 66
Electronic Tubes on the Job 68
Survey of Wide Reading 70
New Patents Issued 80
RMA Organization 88

'43-1

VOL. 2, NO. 1
January, 1943

With Chart—Fundamentals of Sound

Page

Volume × Velocity = Victory! 34
Tank Production Aided by Electronic Methods 36
What the Navy Requires of Radio, Lt. Comdr. A. B. Chamberlain .. 42
Electronic Devices and X-Ray Speed Aircraft Production 45

How to Use This Index

This Index consists of three parts:

1. **An index of contents of issues by months, listing principal articles and features.**
2. **A subject index. References here are to subject-matter of all principal articles and their contents, regardless of title used on article.**

For example, if you are looking up references to the subject of Amplification, you will find a reference "'42-11-62." This means that in the issue for the 11th month of 1942 (November, 1942) an article on page 62 discusses this subject. With this information you can turn directly to the issue itself, if at hand. Or if more convenient by looking in the list of articles for November, 1942, you will find the title and author of the article "Power Transformers for Aircraft Use, by Harry Holubow."

3. **An author index.**

Snowstorm Shifts Radio Beam 47
Specifications for Ceramics 48
Radio—Frequency Heating of Aircraft Parts, John P. Taylor 50
Parts for Civilian Sets 53
RMA Engineering Dept. Concentrates on War, Dr. W. R. G. Baker 54
Factory Short Cuts 56
Engineer, Leader and Teacher (Dr. Lynde Phelps Wheeler) 58
New UHF Landing System at La-Guardia 62
50-KW FM at W55M, D. W. Gellerup 66
Principles of Short Wave Radiation —I, Dr. Ernst Weber 69
BC Operating Methods 74
Electronic Tubes on the Job 76
New Patents Issued 82
New Tubes 90
Army-Navy Preferred Tubes 93
Survey of Wide Reading ...Supplement

'43-2

VOL. 2, NO. 2
February, 1943

With Chart—Radio Frequency Allocations for Western Hemisphere

Page

Business with the Signal Corps, Lt.-Col. C. J. McIntyre 44
Electronic Methods in Shipbuilding, Gilbert Sonbergh 48
Electron Tubes in Simulated Flying, Alton Decker 51
Electronic Equipment in Humid Climates, D. H. Gardner and J. S. Watt 60
Electrostatic Dip Coating Process 63
Factory Short Cuts 64
WFIL Trains Radio Men for Navy 66
How Engineers Can Get Commissions, George W. Bailey 67
Amplidyne Control for Paper Making 69
Direct Harmonic Studies with an Oscillograph, Ralph R. Batcher.. 70
KMPC's Directional Array at Beverly Hills, R. M. Pierce and L. C. Sigmon 72
Principles of Short Wave Radiation —II, Dr. Ernst Weber 76
FM's New W75NY 80
Police FM for Motorcycles, James H. Gentry 83
Radio in Air Travel 84
Radio Controlled Ship Convoys 87
Electronic Tubes on the Job 88
Survey of Wide Reading 90
New Patents Issued 96
AIEE-IRE War Conferences at New York .....Supplement

'43-3

VOL. 2, NO. 3
March, 1943

With Directory—1943 Electronic Engineering Directory Section

Page

Tubes Behind the Guns 58
Electronics vs. Sabotage 60
Features of Mica Capacitor Standard 62
On Big Construction Jobs 64
Factory Short Cuts 66
Telephone-Type Relays in Electronic Applications, C. J. Dorr and L. N. Galton 68
Rebuilding Broadcast Tubes 71
The British Radio Engineer, George Lewis 72
1943 Electronic Engineering Directory Section 81
Alphabetical Finding List of Electronic Manufacturers 108
Guide to United Nations Buying Offices 115
UHF Through Pipes 116
Survey of Wide Reading 118
New Patents Issued 134
Identical Specs for Army and Navy Radio 158
Milestones Toward the Electronic Era 200
Dissolved Gases Increase Emission..204
The Eye's Response to Phosphorescent Paints 212

'43-4

VOL. 2, NO. 4
April, 1943

With Chart—The Cathode Ray Oscillograph

Page

How ANEPA Keeps Electronic Production Flowing 50
In the Chemical Industries, Gilbert Sonbergh 52
Military Vehicle Program 56
Army-Navy Tube "Specs" 59
Factory Short Cuts 60
Shrinkage in Resistor Manufacturing 62
The Cathode Ray Oscillograph in Industry, Ralph R. Batcher 64
The Telephone Stepping Switch in Electronic Applications, C. J. Dorr and L. N. Galton 76
New Standards Make Instruments Interchangeable, J. W. McNair and S. L. Chertok 80
Compact 50-KW Power Amplifier (WNBI) (WRCA), Raymond F. Guy 82
Decoupling Filter for Plate Isolation, H. Jacobowitz 84
Fuse Protection of Small Power Transformers, Robert M. Hanson. 86
When Engineer is Boss (WQXR) .. 90
The Selenium Rectifier—and How it Operates, Carole A. Clarke 94
WIBG's "Stop-Look and Listen" Studio, Frank E. Butler 96
BC Operating Methods 98
Survey of Wide Reading 100
Periodic Table 101
New Patents Issued 104

'43-5

VOL. 2, NO. 5
May, 1943

Page

Sub-Contracting Six Billions of Electronic Purchases, Roland C. Davies 50
AC Resistance Welding Control, Gilbert Sonbergh 52
Ceramic Insulator Specifications ... 56
Manufacture of Quartz Crystals ... 58
Formulas for Resistance-Coupled Amplifiers 63
Eleven Factory Short Cuts 64
Ganged Receiver Units 66
A Self-Balancing Potentiometer, T. R. Harrison, W. P. Wills, and F. W. Side 68
18 Months' Experience with WABC's Island Transmitter, O. W. Read and D. D. Jones 70
Materials and Construction of Speech Broadcast Studios, Lonsdale Green, Jr. 74
Sound Coverage for Airports, Allen A. Sylvane 76
Vacuum Relay for Aircraft Antenna, Frank S. McCullough 79
Taking Guess Work Out of Sound Analysis 81
Relay Links in Broadcasting (WGAR), W. L. Widlar 84
Linear-Frequency Condenser Development, Ralph R. Batcher 88
Hi-Fi Transcribing 90
Electronic Tubes on the Job 92
Survey of Wide Reading 94
New Patents Issued 98
Story of Radar 102
Milestones Toward the Electronic Era 108
HF Heating Is Non-Uniform 146
Television's Future 162
Luminous Materials on Battlefront.165
What Noise Does to People—and Why, Donald A. Laird 173

'43-6

VOL. 2, NO. 6
June, 1943

With Chart—War Production Chart of the Electronic Industries

Page

How Contract Re-Negotiation Works, Roland C. Davies and Earl B. Abrams 50
Murray Hill Laboratories 53
The Food Industries as a Potential Market 54
The Role of UHF After the War, S. Young White 58
NBC's New FM Transmitter (W2XWG) 60
Internal Combustion Engine Analysis 64
Optimum Turns Ratio for Interstage Transformers, Robert M. Hanson. 66
Formulas for R. F. Voltage Amplifiers 69
10 Factory Short Cuts 70
Electronic Uses in Industry (Bibliography), W. C. White 72
Exponential Studio (WOR) 77
